The apartment renovation waste solution - Gold Coast

We only need a height clearance of 1.8 m.

Our aim is to make your waste removal experience easier.

- We can **deliver and collect** our bins from the **basement carpark** or other suitable area.
- Our bins are **lowered and raised gently** with **no damage** to driveways or **ground surfaces**.
- **Internal access Bin** can be **wheeled into a lift**, through a **doorway** and into an apartment.
- Now you can **load the bins at rubbish point** eliminating any **double handling**.
- **Return full bins** to basement carpark or suitable **collection location**.
- Call us and we will **swap or collect bins** and **dispose of the waste**.
- The **Basement Carpark Bin** is ideal for **limited space**, or **low overhead height access sites**.

Internal Access Bins

- Fitted with 200mm braked rubber castors.
- Fits in lift and through a doorway
- Wheel into a unit, office, or shop
- Load bin at rubbish point
- Eliminates double handling.
- Keeps work site safe and tidy.
- **All types of waste no weight restriction**
- **Please Check elevator load capacity**

Bin Suggestions

Full apartment or kitchen renovation:

Internal Access Bins & Basement car Park Bin

If you are removing a mixture of tile waste & cabinetry then we recommend a combination of bins, that way you can use the Internal Access Bins to transport the larger waste like kitchen cabinets, carpet & plasterboard to the basement car park where you can load it into the Basement Car Park Bin which is suitable for this type of waste, then when you proceed to removing the heavier waste such as tiles floor bedding & the small waist that you do not want to double handle you can load the Internal Access Bins.

Bathroom renovation:

Internal Access Bins

If you are removing tile & heavy waste such as bricks tile bedding then you will need to use the Internal Access Bins, these bins are able to be filled with heavy waste & have no load restrictions, however you must always check the elevator/lift load capacity as one Internal Access Bin fully loaded with heavy rubble can weigh as much as 850kgs.

Internal access bin fits through a standard doorway

Shop fit or strip out:

Internal Access Bins:

All waste including concrete & heavy waste.

Basement Car Park Bin:

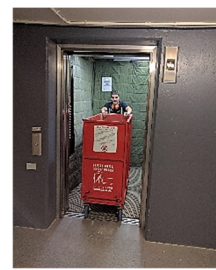

Gyprock, cabinetry & general hard waste

Basement car park bin has a split door for easy loading

Note:

Basement Car Park Bin requires an opening of 1400mm if it is to be wheeled inside a shop

“Why take the rubbish to the skip bin - when you can take the skip bin to the rubbish.”

Common questions

Waste prohibited in bins - Wet Paint – Asbestos – Liquids – Tyres – Wet concrete

How are you able to deliver the bins into the basement car park?

Our concept has been designed for delivering to **underground car parks** and we only need a **height clearance of 1.8 metres**.

Will the driveway or ground surface be damaged when you deliver or collect the bins?

No, our bins are fitted with **rubber castors** and are lowered and raised **gently** by hydraulics and will **not damage** any ground surface.

How many days can I have the bins?

The bin hire is for **7 days** from delivery date, but if you need the bins for a day or two longer & **let me know** in advance then this is usually **not a problem** unless the **bin has been booked** by another client & there a **no other bins available**.

How high can I load the bin?

The bin must only be **loaded level to the top**, any rubbish beyond bin **height or length** will be **left on site** upon collection and remain **responsibility of customer**.

What type of waste can I put in the Internal Access Bins?

Any waste there is **no weight limit**.

What type of waste can I put in the Basement Car Park Bin?

Ideal for larger waste articles such as Gyprock, carpet, cabinetry & hard waste.
1 tonne load limit.

Can I fill the bins with heavy rubble, tiles, or bricks?

Internal Access Bins – **YES**

Basement Car Park Bin – **NO**

How much does a full Internal Access Bin weigh?

1 Internal access bin filled with tile bedding or concrete **can weigh** as much as **850kg**, so you must **check elevator load capacity** full bins should be brought down in lift one at a time.

Can full bins be replaced with empty bins?

Yes, we can replace full bins with empty bins, **each swap is charged as a new bin hire**.

How many bins can be delivered at one time?

1 x Basement Car Park Bin & 1 x pair of Internal Access Bins
1 or 2 x Pairs of Internal Access Bins

How many bins can be collected at one time?

With our collection system only **1 Basement Car Park Bin** or **1 pair of Internal Access Bins** can be collected at a time.

Can I order 1 Internal Access Bin?

No, Internal Access Bins can only be delivered & collected in pairs.

Do you service Brisbane & South of Burleigh Heads.

Yes, but there is a **distance charge**.

Brisbane *\$100.00 and South of Burleigh Heads *\$20.00

*Prices subject to change.
